

Quality Improvement

Medication Non-adherence

Medication non-adherence causes significant strain on the American healthcare system, yet many healthcare providers are unaware of its scope and repercussions. This program will provide facts about non-adherence and information about ways to decrease its occurrence.

Program Material

Online Video presentation 43 minutes ; released September, 2013

- **Available at www.mimhtraining.com/qi-adherence**

Dr. Joseph Parks, MD, discusses the scope and consequences of medication non-adherence and offers tips on how to effectively interview clients in order to develop a successful, client-centered treatment plan. * *Dr. Parks, along with educational content planners Paul Stuve, PhD, and Joel Epstein, PhD, have disclosed that they have no relationship with any commercial firm having products related to topics in this educational activity*

Supplemental documents

- Talking to Clients about Adherence - a brief overview of recommended client interview approaches
- Physician Monograph - a detailed report of research findings regarding medication non-adherence
- A comprehensive review of medical literature on treatment adherence

Learning Objectives

As a result of watching this presentation, viewers will be able to:

- Identify the risks and consequences of medication nonadherence
- Identify common causes for medication nonadherence
- List at least three strategies to encourage medication adherence
